

CarTCell[®]

Fact Sheet

Observed benefits and potential applications

- Helps maintain healthy mobile joints
- Helps maintain balanced normal angiogenesis (development of new blood vessels)
- Improvement in the quality of life of patients suffering from unbalanced matrix metalloproteinase (MMP)

Product composition

- Liquid cartilage extract (cartilage extract and purified water)

Recommended dose

- 1 vial (7 ml) daily for 2 to 3 months
- 1 vial (7 ml) every other day thereafter

Product characteristics

- Liquid extract of hydrosoluble molecules
- Keep frozen to preserve biological potential
- Clear yellowish liquid with a light taste of fish (easily masked when mixed with juice or other ingredients)
- Available in two formats: 60 vials of 7 ml and 24 vials of 7 ml
- Manufactured according GMP standards for foods

Clinical results

- Clinically proven oral bioavailability in a double-blind placebo controlled study
- Proven safety profile (no toxic or side effects have been reported)
- Clinical study supporting the maintenance of increased joint mobility
